STEERLYTE PACKAGED STEERING SYSTEM

SteerLyte EPS offers **FEATHER LIGHT** steering experience. SteerLyte Power Steering generates additional steering torque which is transferred to the steering shaft by means of a worm-gear transmission on the steering helm. Complete kit includes Tilt Hydraulic Helm Pump with SteerLyte EPS Power Unit, Wiring Harness, Heavy Duty Outboard Cylinder, Standard Hoses & High Performance Steering Fluid.

FEATURES & BENEFITS OF STEERLYTE POWER STEERING

- › The SteerLyte EPS is a next generation advanced version of power steering that allows **feather light steering experience** delivering complete linear torque at all speeds
- › It offers **seamless system Integration** with Multisteer Hydraulic Steering System. **Easiest to install** just like a standard hydraulic steering system
- › **Extremely low amperage draw** that enhances battery life and reduces maintenance
- › 100% Silent. **Absolutely no noise from steering** that provides peace of mind
- › No external or additional hoses & fluid tanks are required. It is the **lightest and most compact steering system** in the industry
- › The kit is accompanied with an automotive styled Tilt Mechanism for adjusting wheel position for better steering experience
- › Offers excellent **advanced safety and functionality** as per OEM standards
